

Accumulator System

for Emergency Release cutter

This accumulator system has been designed especially to be used together with a wire/hose cutter. Using an accumulator in conjunction with one of our wire cutters will enable you to operate the wire cutter in an emergency situation where all power from the ship/rig is lost. The accumulator system will be pre-loaded with sufficient power to cut the designated wire/cable without any external power needs.

Key Features

- Easy to operate
- Delivered with hand pump
- Frame made from stainless steel

Specifications
