

Bullseye 0-10 degree range

- OD 350mm / ROV Portable

The 350mm Bullseye with 0-10 degree range provides an accurate and cost effective solution for monitoring inclination subsea. When calibrated to a subsea structure the bullseye gives a true reading of inclination to an accuracy of +/- 0,25 degree. Readings can easily be taken by ROV, camera systems or divers.

Main features:

- All-polymer construction, non-corrosive materials
- Low weight for easy handling
- ROV friendly

350mm Bullseye	
Accuracy	+/-0,25 degree
Max Operation Depth	6000m
Wight in air (Complete)	13,1Kg
Overall height (without handle)	200mm
Outer Diameter	350mm
Dome Diameter	313mm
