

Torque Tool

For Retrofit Anode Installation

This purpose made Torque Tool is specially designed for secure installation of Imenco Retrofit Anode Clamps. With its automatic hold function, Imenco Retrofit Clamps can be picked up, carried and installed by the Torque Tool in one continuous operation. With the integrated reaction fingers, no torque tension is transferred to the ROV manipulator.

Key Features

- Fish tail handle
- Comes with required hoses
- Comes with manual and test certificate

Main Body

Dimensions
(ex. ROV Hadle) Ø182mm x 533 mm

Specifications

Operating pressure	0-200 bar
Torque	100Nm-2000Nm
Weight in water	30Kg
Weight in air	35Kg
Maximum pressure	210Bar
Hydraulic connections	4 JIC
