

Subsea Battery Can

The Subsea Battery Can is a rechargeable subsea battery solution, designed for powering electrical components and systems, such as underwater cameras, lights, lasers and subsea displays. The Battery Can comes with a mechanical ROV on/off switch. The Subsea Battery Can is an efficient and bespoke solution that has been well proved over the past years.

Main features:

- ROV Switch available.
- Voltage at fully charged 29,4VDC.
- Voltage at fully discharged 21VDC.
- 2 connectors 1503 & 1508.
- Rechargeable. Charger comes with.

Weight in air:	14 kg
Weight in water:	8 kg
Dimensions:	368 x 200mm
Power input:	GLENAIR 5506-1503
Power output:	GLENAIR 5506-1508
Depth rate:	3000 msw
