Bullseye 0-5 degree range

OD 250mm / ROV Portable

The 250mm Bullseye with 0-5 degree range provides an accurate and cost-effective solution for monitoring inclination. When calibrated to a subsea structure the bullseye gives a rue reading of inclination to an accuracy of +/- 0.25 degree. Readings can easily be taken by ROV, camera systems, or divers.

Key Features

+/- 0.25 degree accuracy
All polymer construction, non-corrosive materials
Low weight for easy handling
ROV friendly

Main Body

Outer diameter	250mm
Overall height (without handle)	191mm
Weight in air (complete)	6.8Kg
Max operation depth	6000m
