

Hydraulic Compensator

The hydraulic oil compensator is used as a compensator in subsea hydraulic systems or as a reservoir for oil and other chemicals used in ROV operations.

Specifications

Materials	Anodized Al.
Active volume	15.8L
Pressure empty	0,15 BAR
Pressure full	0,25 BAR
Hydraulic connection	¾" BSP
No Off Hyd. Connection ports	4
Optional volume sensor	Yes
Max. operational pressure	1,5 Bar
Length without volume sensor	472 mm
Dimensions	Ø 366
Weight empty (kg)	25 kg
