

# Retrofit Anode Torque Tool

## Verification unit interface

Purpose made Torque Tool for secure installation of Retrofit Anode Clamps. With its automatic hold function, Imenco Retrofit Clamps can be picked up, carried and installed by the Torque Tool in one continuous operation. With the integrated reaction fingers, no torque tension is transferred to the ROV manipulator. It is standard equipped with ROV “fish tail” handle.

### Specifications

Operating hydraulic pressure	0-200 bar
Variable torque from	100 Nm
Max torque @ 200 bar is	2000 Nm
Weight in air	35 Kg
Weight in water	20 Kg
Dimensions (ex. ROV handle)	Ø182 mm x 533 mm
