

Drilling Tool

The drilling tool consists of a drill bit rotated by a hydraulic motor. The tool was designed to be as small as possible, which gives the ROV operator the best possible view of the operation.

Key Features

- Can be fitted with a wide range of drill bits
- Requires low maintenance
- Fitted with flexible fishtail handle
- Small tool. Easy to operate

Specifications

Dimensions	450mm L x 250mm W x 110mm H
Weight	7.4 kg
Max inlet pressure / flow	140 bar / 20 ltr/min
Max speed	630 rpm/min
Rotation	Reversible / Bi-directional
Hydraulic fluid	Tellus 22 or similar
