

# MudMat® 9 Standard

MudMat® is a heavy-duty polyurethane (PU) mat developed for use both offshore and onshore. The mat can be utilised as subsea support, landing and positioning device or as seabed, pipeline and cable protection. The design is based on offshore experience and the requirement for a multipurpose flexible mat. The MudMat® may also be supplied with steel reinforcement.

Certified lifting slings have been integrated in the MudMat® during fabrication resulting in the production of a mat that is robust and easy to handle. MudMat® is available in several standard sizes and weights. The MudMat® is bundled for easy storage and transport. Custom made solutions can be provided on request.

## Specifications

Material	Polyurethane PP-PU-100-65D High Performance Elastomer (PP-Elast PU 65 D)
Integrated lifting slings:	2 Te, green
Dimensions	Available in different sizes. See chart below.

Type	Dimensions	Mass in air/seawater (Kg)		Bundle size
Type	Dimensions (mm)	MudMat® Standard	MudMat® Reinforced	L x W x H (cm)
<b>MudMat® 30</b>	6000x5000x30	674/94	730/149	614x60x40
<b>MudMat® 18</b>	3600x5000x30	410/57	445/91	367x60x40
<b>MudMat® 9</b>	3600x2600x30	220/31	238/49	367x60x20
<b>MudMat® 4</b>	2400x1600x30	91/13	99/20	243x30x15
