

ROV Compensator Backpack

NOR ROV intervention backpack is a lightweight rack which can hold 4x 16ltr compensators. This can be fitted to the back of the ROV and will enable the ROV to hold fluids up to 64ltr. This can be used for fluid injection or to operate subsea tooling which requires a large amount of hydraulic oil. Can be connected to NOR IHPU, DWP etc.

Key Features

- Lightweight
- Easy integrated
- Large amount of compensated fluid
