

NOR 5-Station Valve Pack

RQ-068-011-01

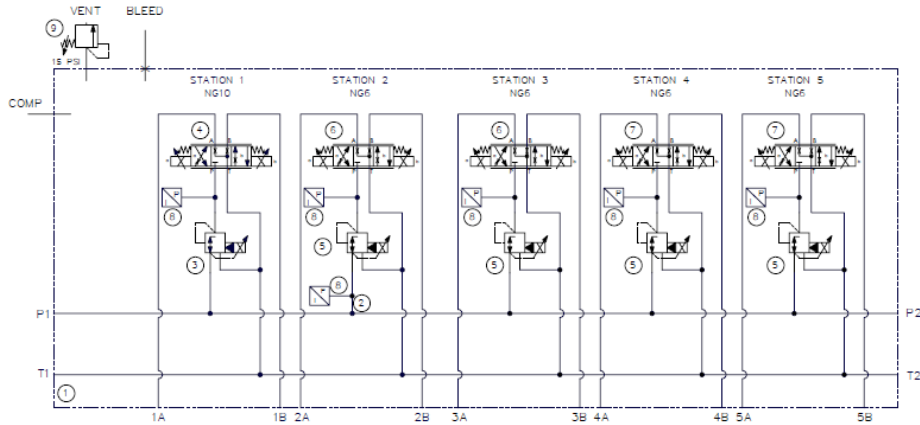

5-Station Valve pack is a very versatile system which can be integrated to almost any skid or backpack. It has a touchscreen software which is capable of operating all the valves proportionally, with accurate pressure and flow control. The software also is capable of logging and exporting data, which will give you very good control over monitoring pressure and flow on external tooling. Valve pack is set up with 3 external sensors to monitor compensator, pressure sensor and flow rate sensor.

Sensor input

- 1x Compensator
- 1x Pressure Sensor
- 1x Flow rate Sensor

Specifications

Dimensions L x W x H	400 mm (L) x 380 mm (W) x 310 mm (H)
Weight in air	45.1kg

Specifications - Hydraulic Connections

Maximum Pressure	Input	3,000 psi (207 bar)
	Output	0-3000 psi (207 bar)
Flow Rate	Input	100 LPM
	Output	0-100 LPM
Pressure	12 JIC	3K PSI Rated
Return	8 JIC	3K PSI Rated
Comp	4 JIC	3K PSI Rated
1 A&B	12 JIC	3K PSI Rated
2,3 A&B	6 JIC	3K PSI Rated
4,5 A&B	4 JIC	3K PSI Rated
