

ROV Tool Drawer Skid

ROV Tool drawer skid can be fitted to many types of ROV's, and has space to install DWP, valve packs, IHPU's or any other applicable equipment which can be supplied by NOR. Here is also the possibility of adding more buoyancy to make it lighter in water. This is a very robust skid which can withstand heavy loads in harsh conditions.

Specifications

Mechanical	To suit ROV fitted ISO interface, can be fitted to various types
Hydraulic capacities	Max. 200 bar
Fluid	Shell Tellus S22 or similar
Max. water depth	3000MWS
Length	1800mm
Width	3195mm
Height	633mm (732 incl. interface pins)
Weight in air	Approx. 1200kg incl. balance weights
Weight submerged in water	0 kg
