

Station High Flow Valve Pack

3-Station High Flow Valve pack is a very versatile system which can be integrated to almost any skid or backpack. It has a touchscreen software which is capable of operating all the valves, high flow valve is proportional the two others have directional control. The software also is capable of logging and exporting data, which will give you very good control over monitoring pressure and flow on external tooling. Valve pack is set up with 2 external sensors to monitor compensator, pressure sensor and flow rate sensor.

Specifications	
Dimensions L x W x H	400 mm (L) x 380 mm (W) x 310 mm (H)
Weight in air	45.1kg
Max pressure Input	207 bar
Max pressure Output	207 bar
Flow	0-165 lpm
Pressure and Tank	JIC 16
Pressure out	1 A & B JIC12
	2 A & B JIC 4
	3 A & B JIC 4
