

The Dusky Green Line Laser is a small size & low weight laser for Subsea measurements. The Dusky laser is a green line laser used when measurements are needed from video images. The green light ensures good visibility due to reduced absorption of green light in water.

Specifications

Wavelength	532 nm
Output	30 mW
Lens	60° (30°, 45°, 90° on request)
Power	12 – 32VDC / 2 W
Materials	High grade Aluminium
Dimensions	35mm x 195mm
Weight	0.4 / 0.3 kg
Depth rating	3000 msw
Std. Connector	MCBH4M
