

SUBSEA AX/VX Mechanical Ring Tool

The AV/AX Ring/Gasket Tool for removal/installation of AX/VX gaskets is a mechanical tool with no requirement for hydraulic or electric supply from an ROV. This gives the operator the option to transport the tool to/from the worksite without recovery of the ROV. Suitable for use with or without tubing hanger installed in the wellhead.

Key Features

No need for hydraulic supply
Other ring sizes available upon request
