

4-Station Proportional IVP

4-Station Valve pack is a very versatile system which can be integrated to almost any skid or backpack. It has a touchscreen software which is capable of operating all the valves proportionally, with accurate pressure and flow control. The software also is capable of logging and exporting data, which will give you very good control over monitoring pressure and flow on external tooling. Valve pack is set up with 4 external sensors to monitor compensator, pressure sensor and flow rate sensor.

Specifications

Maximum Pressure	207 bar
Flow Rate	35 lpm
Pressure	JIC 8
Return	JIC 8
Comp	JIC 4
1 & 2 A&B	JIC 6
2,3 A&B	JIC 4
Size	342x146x250mm
Weight	20kg
