## **NOR DOP intervention Skid**

**NOT Offshore** Rental

The NOR intervention skid is made to be used for many different tasks, it's capable of pressure testing, intervention and fluid injection. There are flowmeters on all outputs on the valvepack which makes it great for difficult tasks. Software is setup of for logging and other various applications.

Pressure sensors

Pressure testing and logging

- Can be mounted onto most ROV types
- All valves are proportional
- Tool basket

## **Specifications**

Max Supply:207 bar & 90lpmHigh Pressure:2x 700 barInternal Resovoir:16 liter ( Backpack wMax output:207 bar & 65 lpmWater depth:3000m

## **ROV Connections:**

Pressure:	JIC 12
Return:	JIC 12
Pilot Valve:	JIC 4
Motor Drain:	JIC 8
Tool basket cylinder:	2x JIC4
Pilot valve for pressure testing:	2x JIC 4

207 bar & 90lpm 2x 700 bar 16 liter ( Backpack with additional 64 liters can be added ) 207 bar & 65 lpm 3000m

Weight in air:	935kg
Weight in water:	-37kg
Dimensions:	2400 x 1730 x 500mm
<b>Certification:</b>	R60/S45

## **Electrical connection: 5501-2013**

Communication:RS232 (Ethernet and RS484 optional)Power:24VDC
