

NOR Concrete Mattress Installation frame

This frame is developed to install concrete mattresses at seabed, it's designed so it can be used by divers, ROV and just a vessel with applicable sensors. For ROV and Diver it's operated manual, with double safety locks. While it can also be used to install mattresses with hydraulic supply from a vessel HPU. This will allow the frame to be used in multi discipline and great flexibility. It also has the setup for having two mattresses at one go, with separate lever arms for installing.

- Certified According to DNV GL ST E2.7-3 R60
- Forklift pockets
- ROV Grabber bars
- Easily operated

Specifications

Weight in Air	2800kg (Frame only)
Weight in water	2430kg approx. (Frame only)
Maximum Gross Weight	24 000kg
Dims	6340mm x 2500mm x 640mm
